PROFILE:

I'm a Hardworking and enthusiastic candidate. I specialize in building responsive, user-friendly, and performance-optimized web applications. With strong expertise in modern front-end and back-end technologies, I translate design concepts into scalable and functional web solutions. Passionate about clean code, continuous learning, and delivering high-quality software that meets user needs and business goals.

CERTIFICATIONS:

- Completed Diploma/Certificate Course "Software Testing" at Thiagarajar College , Madurai **Apr2022**

PROJECT:

PROMPTOPIA - Built using NEXT JS , Tailwind CSS , NextAuth, MongoDB

A full-stack web application for storing, sharing, and exploring AI-generated prompts, authenticated via Google OAuth using NextAuth. Implemented features include secure user authentication, dynamic user-specific prompt management, and a visually appealing, responsive interface. Built with **Next.js**, **MongoDB (Atlas)** for database management, and **Mongoose** for schema modeling.
