PROFILE:

I'm a Hardworking and enthusiastic College Student working towards a Master of Computer Applications. I have a strong ability to create user-friendly and responsive web applications. My skills in modern web development frameworks allow me to translate design specifications into functional websites. I am dedicated to delivering high-quality and optimized web solutions.

CERTIFICATIONS:

- Completed Diploma/Certificate Course "Software Testing" at Thiagarajar College , Madurai   **Apr2022**

PROJECT:

PROMPTOPIA - Built using NEXT JS , Tailwind CSS , NextAuth, MongoDb

A full-stack web application for storing, sharing, and exploring AI-generated prompts, authenticated via Google OAuth using NextAuth. Implemented features include secure user authentication, dynamic user-specific prompt management, and a visually appealing, responsive interface. Built with **Next.js**, **MongoDB (Atlas)** for database management, and **Mongoose** for schema modeling.

Source code : https://github.com/vikkkyvignesh/promptopia

User To-Do List - Built using React JS and Firebase

A web application developed using React.js and Firebase to manage and store users' todos. This project highlights skills in front-end development with React and backend integration with Firebase, ensuring real-time data synchronization and secure user data storage.

Inventory Management App-Built using React JS and MongoDB

A comprehensive inventory management system developed using the MERN stack (MongoDB, Express.js, React.js, Node.js) to store and manage shop details. This project demonstrates expertise in full-stack development, handling data storage, backend logic, and creating an interactive and responsive user interface.
